SouthEast Educational, Inc. (SEED)

SEED provides data analysis, curriculum alignment, and content-specific professional development; school and district improvement plan and restructuring assistance; and evaluation services to regional and national clients.

Data Analysis

SEED staff members help educators develop the site-based capacity for data analysis enabling school-based teams to effectively investigate achievement gaps, root causes, maximize student achievement, and identify professional development foci.

TnACHE

SEED is home to the Tennessee Appalachian Center for Higher Education (TnACHE) which addresses the lack of educational opportunity for rural Appalachian students affected by systemic, chronic poverty. The program focuses on utilizing data to help educators make better instructional decisions, increasing graduation rates and awareness about post-secondary education, and raising teacher expectations.

Content-Specific Professional Development

SEED staff members provide professional development in:

- Science and mathematics curriculum development and mapping, formative assessment, GEMS programs and support, and curriculum topic study.
- Science inquiry, experimental design, and AAAS Project 2061 standards institutes.
- Reading and writing across the curriculum, and reading strategies institutes.

Evaluation

SEED is a data-driven corporation engaged in qualitative and quantitative evaluation. SEED staff are members of the American Evaluation Association and evaluate regional, state and federal research projects.

School Improvement

SEED staff members provide a variety of school improvement workshops and assistance including:

- Strategic planning
- Curriculum audits
- School and district improvement plan development
- Meeting NCLB and post-NCLB requirements
- Multiple learning styles
- Grant and proposal development
